R4B-2	13:34		
	13:36	<i>Break</i>	0:30
	14:08	Prize Giving	

**NOTES:**

1 All times are estimated and subject to delays... and the weather!

2 The times from each race - A and B - are added together to create the race time.  
If a driver is disqualified the time, if known, will be recorded - with a 100 second penalty

2 All going well the races are as follows:

- Race 1 All 24 cars race twice (Race 1A and Race 1B)
- Race 2 The top 16 cars from Race 1 race twice (Race 2A and Race 2B)
- Race 3 The top 8 cars from Race 2 race twice (Race 3A and Race 3B)
- Race 4 The top 4 cars from Race 3 race twice (Race 4A and Race 4B)  
The NZ Champion will be the winner of Race 4

3 If the weather prevents completion of races then the organizers reserve the right to change it, depending on the number of races that have been completed, as follows:

- Worst Case Race 1A has been completed:  
The top 5 drivers from each lane in Race 1A (10 drivers total) will race again in a one lane "shoot out"
- Slightly better Races 1A and 1B have been completed:  
If the weather permits the top 8 drivers from Race 1 will race again in a one lane "shoot out"  
If the weather does not permit this the NZ Champion will be the winner of Race 1
- Better Races 2A and 2B have been completed:  
The top 8 drivers will race again in a one lane "shoot out"  
If the weather does not permit this the NZ Champion will be the winner of Race 2
- Even better Race 3A and 3B have been completed:  
The NZ Champion will be the winner of Race 3
- Best case Races 4A and 4B have been completed:  
The NZ Champion will be the winner of Race 4
- Weird case If something other than the above happens.... The organizers reserve the right to "work it out on the day" in the fairest manner possible
