

## Whangaparaoa Race Track

This track will be used for the 2013 Finals.

A few photos from 2010 to give teams an idea of what the track is like

Start Line – Pit Crews are in tents to the left

Start line (note position of neighbouring house)

From the start line looking down the track. Note the Pit Crew tents on the right

The road surface is sealed stone chip with smooth seal just past the finish line.

For those drivers used to smooth seal it can be disconcerting to race on it for the first time - so we advise a few practices on a stone chip surface prior to race day.

The braking area is smooth seal.

From part way down the track looking back to the start line (top right)

From the finish line looking back to the start line (top right)

### Finish Line

- The finish banner is just visible at the top
- The hay bales are protecting the timing reflectors
- The Timing team are in the yellow vests on the left by the timing beams
- Note the change of road surface from chip to smooth
- The Brake Now signs are on the smooth seal

**Brake Now** signs at island

Run off and stopping area past island
